Professional Summary:

Salesforce Developer with over 3 years of hands-on experience building custom solutions on the Salesforce platform. Certified Platform Developer I (PD1) with a strong foundation in backend Apex development (triggers, batch processing, asynchronous logic), frontend LWC, and data manipulation with SOQL/SOSL. Experienced in turning functional business requirements into clean, scalable code while prioritizing governor limits, security models, and platform stability.

Certifications:

Salesforce Certified Platform Developer I (PD1).

Educational Qualification:

Bachelor of Technology (B.Tech) in Electrical and Electronics Engineering from Tirumala Engineering College – Jonnalagadda (Narasaraopet) (2019-2023).

Technical Skills:

Salesforce Backend: Apex (Classes, Triggers, Batch, Schedulable), SOQL, SOSL, REST/SOAP APIs.

Salesforce Frontend: Lightning Web Components (LWC), Aura Components, Visualforce, JavaScript, HTML/CSS.

Salesforce Admin & Config: Flows, Validation Rules, Security (OWD, Profiles, Roles), Reports & Dashboards.

Tools & Deployment: VS Code, Cursor, Copado, Gearset, Bitbucket, Data Loader, Postman.

Professional Experience:

Working as Salesforce Technical Consultant in Bigworks Technologies Pvt. Ltd. From July 2023 to present.

Project Details:

Project 2	Wealth Enhancement Group (WEG)
Role	Developer
Duration	DEC 2023 – NOV 2024
Description	- Developed reusable Lightning Web Components (LWC) for core business modules, improving UI responsiveness and user adoption. - Built optimized Apex controllers, Batch Apex, and Trigger frameworks adhering to Salesforce governance limits and best practices. - Configured complex Record-Triggered Flows and automated business validation rules to streamline daily user operations. - Authored unit test classes ensuring >80% code coverage for seamless deployment.

Project 1	ONWARD MEDICAL
Role	Support Developer
Duration	JAN 2025 - Present
Description	- Configured core platform security architecture, including Organization-Wide Defaults (OWD), Role Hierarchies, Profiles, and Permission Sets to enforce strict data access controls. - Streamlined business processes by designing and deploying declarative automations using Record-Triggered Flows, Screen Flows, and complex Validation Rules. - Built customized Reports and dynamic Dashboards to provide actionable operational metrics and business visibility for stakeholders. - Managed end-to-end data maintenance and mass migrations using Data Loader, ensuring data integrity across standard and custom objects. - Handled user provisioning, custom page layouts, record types, and email alert configurations to optimize daily system usability. - Managed sandbox testing and production deployments via Change Sets, troubleshooting validation errors and ensuring deployment readiness.
